“Classic aviation and a Gin Martini with a fresh lime twist” is the inspiration behind this design for a teenage boy’s bedroom. “Drawing initial inspiration from black and white photos of classic aluminum-sided airplanes, we generated a palette of grays, taupes, bright white and a fresh splash of lime green,” says Jelinek and Medoff. “We used clean lines, some angles, textures and a touch of vibrant color to kept the room young, sophisticated and striking.” Lighting seems to take flight from the walls while the custom bed conveys a feeling of floating. In the bathroom, a hand-painted floor design mimics a series of runways as seen in-flight.
